

Bank Marketing Prediction Project Documentation

1. Introduction

This project builds a Logistic Regression model to predict whether a customer will subscribe to a bank term deposit using the Bank Marketing dataset.

2. Workflow

01

Load dataset

02

Exploratory Data Analysis (EDA)

03

Data preprocessing

04

Train-test split

05

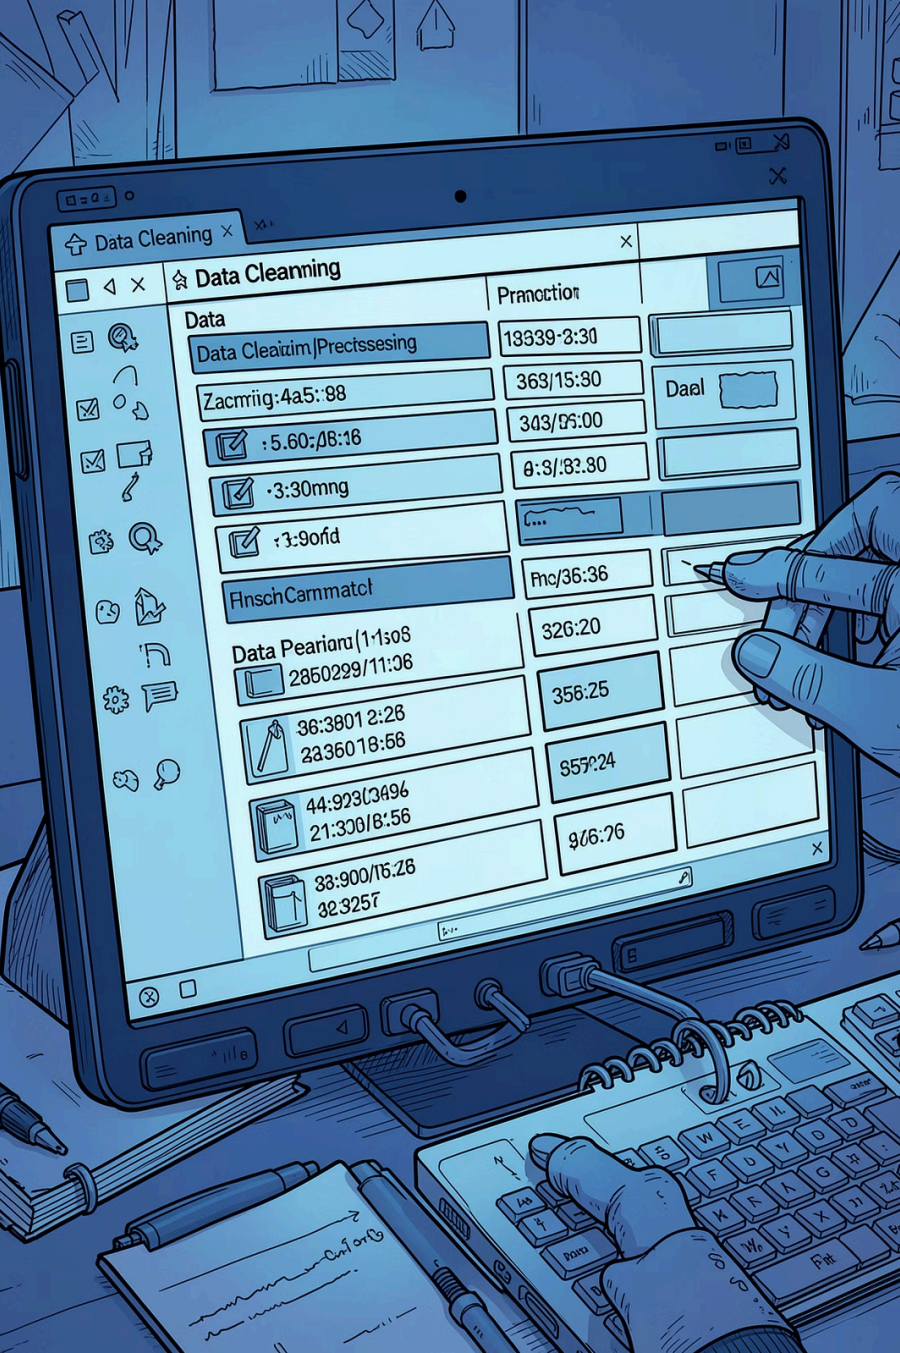

Model training using Logistic Regression

06

Evaluation using Accuracy, Precision, Recall, F1-score, Confusion Matrix, ROC-AUC

07

Visualization

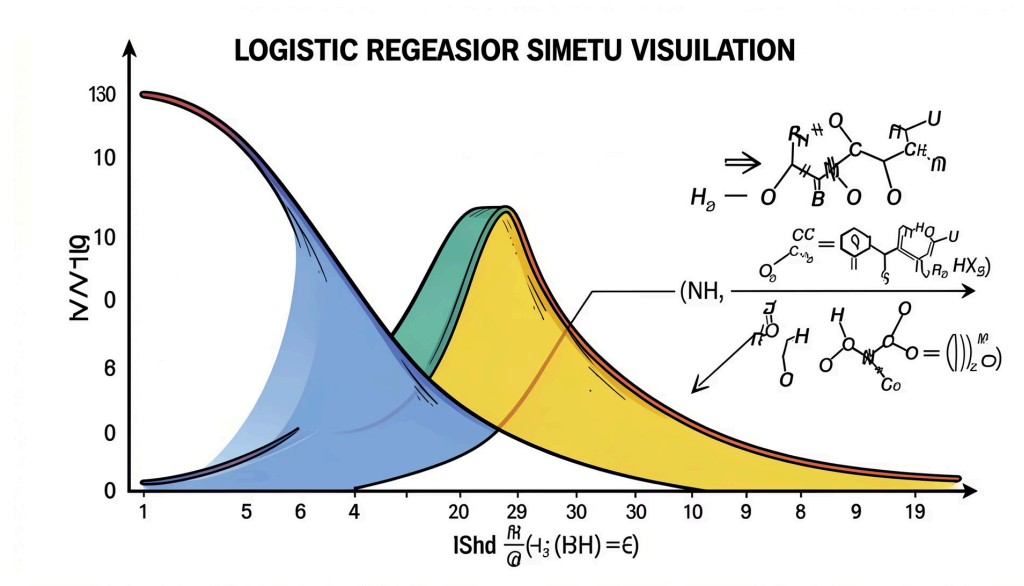

3. Preprocessing

Unknown values are replaced, missing values handled, categorical features encoded, numerical features scaled if required.

4. Model

Algorithm

Logistic Regression

5. Evaluation Metrics

Accuracy

Precision

Recall

F1-score

Confusion Matrix

ROC Curve

6. Conclusion

The notebook demonstrates a complete binary classification pipeline for bank marketing prediction.
